## WRC-07 CONFERENCE PREPARATORY MEETING UNDER WAY IN GENEVA

The ARRL Letter Vol. 26, No. 08 Feb. 23, 2007

Some 800 delegates representing 97 countries are attending the second session of the International Telecommunication Union (ITU)

Radiocommunication Sector (ITU-R) Conference Preparatory Meeting (CPM-07) in Geneva. A major step along the way to World Radiocommunication Conference 2007 (WRC-07), CPM-07 convened February 19 and will continue until March 2. Representing Amateur Radio are International Amateur Radio Union (IARU)

<<http://www.iaru.org>> President Larry Price, W4RA, and Technical Representative Ken Pulfer, VE3PU. Other Amateur Radio representatives are part of national delegations. CPM-07 will finalize the technical report that will guide the work of delegates attending WRC-07 October 22 through November 1. Drafting the CPM Report has occupied several ITU-R working parties for the past three years. No final decisions will be made at the CPM.

CPM-07 addresses 27 separate agenda items with a view to formulating the technical, operational and regulatory information on which WRC-07 will base its decisions. The resulting CPM Report provides background information on each WRC-07 agenda item, various methods of addressing the agenda items and the advantages and disadvantages of each. The first session of the Preparatory meeting, held immediately following WRC-03, organized the necessary conference preparatory studies for WRC-07. Most study groups wrapped up their work last fall.

WRC-07 agenda items of interest to Amateur Radio involve allocations in the 4-10 MHz range, a possible secondary allocation to the amateur service at 136 kHz, the modification of footnotes to the Table of Frequency Allocations, and the selection of agenda items for future WRCs.

WRC-07 agenda item 1.13 will review allocations to all services between 4 and 10 MHz, excluding allocations from 7.0 to 7.2 MHz, which were settled to the advantage of Amateur Radio during WRC-03. Starting in March 2009, radio amateurs will enjoy a worldwide 200 kHz segment on 40 meters.

WRC-07 agenda item 1.15 will consider establishing a secondary Amateur Radio Service allocation in the band 135.7 to 137.8 kHz. While CPM Report text describing a method to provide this allocation appeared to be finalized by February 22, it's no guarantee that WRC-07 will actually make the LF allocation.

## AARA's newest honor roll member.

Bill Moore (NC1L) head of the DXCC desk presents Dave Jones (W2GDJ) with his Honor Roll plaque. To earn this award, you must work and have confirmed 328 of the 337 current DXCC countries. Not an easy feat. Nice going Dave!

### Revised ARRL Band Chart available

A new ARRL band chart reflecting all recent changes to the FCC Amateur Radio Service rules as of February 23, 2007, now is available for downloading on the ARRL Web site in either black and white or color versions <<http://www.arrl.org/FandES/field/regulations/bands.html>>. Created by ARRL Senior Technical Illustrator, Dave Pingree, N1NAS, the attractive new chart represents a major change from earlier designs. This is the same chart featured in the eight-page "Welcome" tear-out section in March QST (following page 48). The entire QST tearout also is available for downloading in PDF format <<http://www.arrl.org/HFWelcome/Welcome.pdf>>.

## W2QSL Bureau Rate Increase

The W2 QSL Bureau, run by the North Jersey DX Association, will be increasing its subscriber rates. Effective April 1st the minimum credit purchase will be ten postage credits for \$6.00. The bureau has kept rates flat for several years absorbing four postage rate increases by cutting expenses and streamlining its operations as much as possible. Based upon news of more postage increases due this spring the Bureau felt it could no longer absorb rate increases without a change. In spite of the increase using the bureau option is still the best dollar value around as evidenced by the amount of QSL cards still handled. More information can be found on the NJDXA webpage: [www.njdx.org](http://www.njdx.org). It also lists meeting and program dates as well as other DX news and links. Thanks W2UDT for the info....

OSCAR Orbital Satellite Carrying Amateur Radio  
The ARRL Letter Vol. 26, No. 08 Feb. 23, 2007

Pehuensat-1 gets designation: AMSAT OSCAR Coordinator Bill Tynan, W3XO, has announced that AMSAT has issued an OSCAR number to Argentina's Penuensat-1 satellite. It will be known as Pehuensat-OSCAR-63, or PO-63. The second Argentine Amateur Radio satellite, Pehuensat-1 is in a 635 to 640 km sun-synchronous polar orbit (97.92 degree inclination). It was launched January 10 from India. Pehuensat-1 will transmit voice messages in three languages -- English, Hindi and Spanish -- on 145.825 MHz followed by AX.25 1200 bps packet. Named after the native Patagonian Pehuen tree, Pehuensat-1 was developed by the Argentina School of Engineering at the National University of Comahue, the Argentina Association for Technology and Space and AMSAT-LU. More information is on the AMSAT-LU Web site <<http://www.amsat.org.ar/>>. Reception reports are welcome <<http://www.amsat.org.ar/?f=z>>.
